

TECHNICAL INFORMATION

Piled Slab Underpinning

- ① External wall.
- ② Internal wall.
- ③ Existing foundation.
- ④ Intermittent nib cast into wall.
- ⑤ Piles at close centres to carry external wall loading.
- ⑥ Piles on integral grid matrix to carry slab and internal walls.

General Information

The provision of a new reinforced concrete floor slab nibbed into the existing walls of a structure, supported on piles is often used when underpinning a complete structure.
